

COUNTAMAT

The COUNTAMAT range of laminated material manufactured by MICAM has been designed specifically to meet the exacting requirements of the diemaking industry.

A high strength laminate based on fine woven glass fabric reinforced surface layers and a kraft paper reinforced phenolic core.

This range of glass fibre reinforced phenolic sheet material is designed for use in flat bed steel rule dies.

MICAM's COUNTAMAT counterplates provide high quality durable counter material developed for clean routing yet long run durability.

Key properties are:

- A glass fibre reinforced surface ensures high wear resistance.
- A full range of sheet thicknesses from 0.40mm to 1.40mm is available.
- Material is supplied within close tolerance limits of ± 0.02 mm.
- It is mechanically very strong because of the glass fibre reinforcement.
- High quality durable counter material
- Developed for clean routing yet long run durability
- 1070 x 1050 sheet
